

GENERAL INSTRUCTIONS

Installation instructions

The wall mount box and the mounting kit may be installed in a cut out in the wall, in a wooden structure thick at least 1,5 cm or in a dry mortarless construction. The cut out has to respect the sizes specified in the technical data and has to be at least 9 cm deep.

In the wall cut out, the box can be built in while it can be screwed on in a piece of furniture. It is important that the fore edge of the MTZxx is flat and horizontally to the surface of the wall or the piece of furniture.

DEVICE CODES

Compatibility	in wall mount box	in mortarless mount kit	in wall mount box	in mortarless mount kit
DTZ07	normal mount		flush mount
